2. PCT Article 33

The present application does not meet the requirements of PCT Article 33(1) because the subject matter of claim 1 is not novel within the

meaning of PCT Article 33(2).

2.1. **D1** discloses a calibration line arrangement for adjusting the output power of a HF signal source in which (the references in parentheses are to this document):

- an electronic calibration line (damping element 8) is arranged between the signal source (input of 9) and an output (output of 10) by means of mechanical transfer switches (9, 10) on the input side and the output side;
- said mechanical transfer switches (9, 10) are switched such that, in the one position, the electronic calibration line (damping element 8) is connected and, in the other position, a direct bypass line between the signal source and the output is connected.

Therefore, the subject matter of **claim 1** is **not novel** (PCT Article 33(2)).

2.2. The following citations are likewise prejudicial to the novelty of claim 1:

- D2 discloses a calibration line arrangement in a power measuring device for adjusting the output power of a HF signal source (damping element 120 + transfer switches 110+150);
- D3 (figure 7) discloses a calibration line arrangement (71; according to column 12, lines 39-43, 71 can be a damping element) for adjusting the output power of a HF signal source

Box No. V	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

(output of 7);

- D4 (see page 2, line 29 to page 3, line 8 and figure 1) discloses a calibration line arrangement (5) for adjusting the output power of a HF signal source (1);
- D5 (see the abstract and figure 1) discloses a calibration line arrangement for adjusting the output power of a HF signal source.

3. Dependent claims

3.1. Dependent **claims 2-6** do not contain any features which, in combination with the features of any claim to which they refer back, meet the PCT requirements for novelty and inventive step. The reasons are:

- the feature of **claim 2** is disclosed in **D3**: see figure 5 and column 12, lines 39-43;
- the feature of **claim 3** is implied in **D4**, wherein relay transfer switches are used: see the abstract;
- the feature of **claim 4** pertains to a standard procedure, adoption of which would not go beyond normal professional practice for a person skilled in the art;
- the feature of **claim 5** is disclosed in **D1**: see the abstract, paragraph 2;
- the features of **claim 6** are disclosed in **D1**, wherein a surge detector (c) is assigned.
